

REMARKS/ARGUMENTS

The undersigned wishes to thank the examiner for his careful examination, and accordingly there are changes cancelling claim 1 and correcting the errors noted regarding 35 USC 112. is Clearly, Rhee didn't provide anything like applicants Figure 4 and using the claimed features. Reconsideration is requested.

Because the dependent claims based on the amended claim 2 relate to a different kind of circuit than the broad mechanism of the reference and former claim 1, Claim 2 in the new combination along with the claims upon which they depend are considered separately patentable.

By cancellation of the rejected claims, and revision of the claims, all claims now are allowable as amended.

This application is believed to be in condition for allowance and notice thereof is requested.

Respectfully Submitted,  
For the Inventor(s):

/Lynn L. Augspurger/
